

## SOFTWARE AND HARDWARE PACKAGE

The NControl MC (Master Control) Software and Hardware Package expands on the convenience and efficiency of the other NVerzion packages by offering access to your master control switcher and graphics-related tools. A traditional master control will typically include effects, transitions, and other features that can enhance the channel presentation. The NVerzion MC Package includes controls to enhance these abilities, it can additionally support character generators, downstream keyers, and more.

Shown are examples of NGesture, NControl, NBase, and NView applications

### Package Includes

- NGesture - Dub-station software
  - Transfers frame-accurate content from one source to a record destination. Also supports backup devices.
- NPoint or NFinity View preparation
  - Provides reviewing, segmenting, and trimming
- NControl MC - Playlist software for master control switcher
- NBase-SQL - Media Database Manager
  - Maintains local database of server clips and metadata
  - Communicates changes between applications
- NView - Media Database Viewer
  - Operator can view, filter, sort, and edit data base fields
- NConvert - Traffic/scheduling conversion software
- EMC - Ethernet Machine Control and Router Control
  - Configurable control for up to eight serial devices
- Computer System
  - 2RU rack mount chassis
  - Single Pentium processor, dual mirrored drives
  - eight-port PCI 422 serial card
  - Redundant power supplies

Note: Keyboard, monitor, and mouse are not included

### FAQs

Add as many channels as you like. Add monitoring and control software anywhere and expand your operation without limitation.

- Can the system be tailored for a station's individual needs?  
*Yes. The software architecture is designed to accept specific customer modifications.*
- What is the maximum number of devices a system can expand to? Is the physical location of devices important?  
*There is virtually no limitation on the number of devices, or where they can be located.*
- Is the system extendable?  
*Yes. The package can be expanded to any number of dubbing channels, playout channels, archives, etc. Additional capabilities can also easily be added, such as central casting, dish control, and asset management.*
- What kind of devices can this package control?  
*The system uses VDCP to control video servers and is server agnostic. The system also supports a variety of playback devices. Optional controls can be added for more device control.*
